Construction:

Metallized polypropylene film, Non-inductive, self-healing construction. Plastic prismatic flame retardant case.

Applications:

Capacitors for AC and DC applications

Technical data

Rated voltage U_R: 1200 VDC; 500V/50Hz

Rated voltage is the max. DC or peak voltage, for which the capacitor is designed.

If the capacitor works with the DC and also super-imposed AC voltage UAC, the sum of DC and the amplitude of AC must not exceed the UR

Max permissible AC voltage:

If the working frequency is higher, the permissible AC voltage must be decreased, not to exceed the max. loss power of the capacitor.

$$\text{Max.U}_{\text{AC(f)}} = \sqrt{\frac{P_L}{2\pi f C_R \times tg\delta}}$$

Rated capacitance: 0,5 µF - 5 µF

Tolerance: 10%, 5%

Dissipation factor Tgδ: < 0,001 at 1kHz and +25°C

Insulation resistance $R_{\rm is}$: >10 000/C [M Ω] Operating temperature range: -55 ÷ +85°C

The highest permissible capacitor temperature at the hottest point of the case must not exceed +85°C.

Max . permitted dissipation power of the capacitor PL:

depend on the cooling conditions.

Test voltage between terminals: 1,25 × U_R, 1min. at +25°C All capacitors are tested by the routine test by the manufacturer

Protection against Overvoltages:

The capacitors are self-healing and regenerate themselves after occasional breakdowns. The capacitor remains fully functional after the breakdown.

Permitted Overvoltages in working conditions:

1,10 × U_R max. 30% of the service period

1,15 × U_R max.30min./day

1,20 × U_R max. 5min./day

1,25 × U_R max. 1min./day

If the Overvoltages exceed the permissible values above,

the capacitor might have been destroyed.

Test voltage between terminals and case:

3000VDC, 1min. at +25°C

Max. repetitive rate of voltage rise dU/dt:

< 500V/µsec at U_R and +25°C Max. peak current I_p : $< C_R \times dU/dt$ Terminals: solder tags or fastons

Related standards: IEC 60384-1, IEC 60384-17

Marking for purchase ordering: MKPI 300-150

Warning! The manufacturer is not responsible for any damages, caused by the improper installation and application. Before using the capacitor in any application, pleas, read carefully this technical data-sheet.
